

Roadmap to Support

Diagnosis

- 1 in 36 children diagnosed each year.
- Know the signs: early intervention helps.
- A diagnosis unlocks support services.

Early Intervention

- Early intervention improves outcomes.
- Builds essential skills through playful learning.
- Empowers YOU to support your child.

Education

- Your loved one has the right to a good education.
- Individualized Education Plans (IEPs) are collaborative.
- Build a strong team for success.

Treatment

- Personalized and multidisciplinary.
- ABA therapy, speech therapy, occupational therapy, and more.
- Specialized day and residential programs for extra support.

Family Support & Advocacy

- Build a strong support system and connect with others.
- You are your child's strongest advocate.
- Take time for yourself and practice self-care.

Transition

- Start preparing for adulthood early.
- Develop essential life skills, pursue job training.
- Learn about changes in funding for services.

Adulthood

- Foster career growth, independence and social connection.
- Health and well-being greatly impact quality of life.
- Financial and estate planning for the future.

Residential Programs

- Supportive living environments for children and adults.
- Variety of residential settings to meet individual needs.
- Finding the right fit is important.
